- **brAym** table includes **7 lines and 64 symbols** made by exchanging dots in **brAy** cell columns.
- **Each line contains 10 symbols** except the seventh line which contains only four symbols.
- **The symbols of the first line are repeated** in the next 3 lines and lowered in the 5th line.
- The symbols of the first line are used as **Arabic numerals (1-9, 0)** when preceded by (#).
- The {Taha} alphabet uses geometric Arabic letters and is written from right to left.
- The {Taham} alphabet uses inverted Geometric letters and is written from left to right
- The {brAym} alphabet is the opposite of {brAy} and is written from right to left as {Taha}.
- **Universal Phonetic Alphabet (UPA)** includes 3 compatible alphabets {Taham wAw brAy}.
- The English {wAw} alphabet represents the small and capital Latin matching letters {lml}.
- {Taha} and {brAym} are recommended for writing Arabic texts from right to left. {Taham} and {brAy} are recommended for writing English and French texts from left to right.
